

QWIKBRIGHT®

Coil Cleaner & Protectant

QT2782

Don't just clean your coils, protect them... with QwikBright.

QwikBright is a neutral pH microchannel coil cleaner and protectant that is specially formulated to quickly penetrate and dissolve grease, grime, lint, dirt, dust, and bugs while adding a metal protecting film. That's right, QwikBright contains a molecular metal protectant to further prevent corrosion without degrading thermal performance.

- Safe for microchannel heat exchangers
- Neutral pH
- Heavy Duty Foaming Action
- Improves Coil Efficiency
- Includes Metal Protectant to Extend Life
- For Indoor or Outdoor Use

DIRECTIONS FOR USE

1. Always wear goggles, gloves, protective clothing, and a full face shield.

2. Make certain the unit is off and disconnected.

3a. If using a spray bottle, dilute QwikBright to the appropriate ratio using the mixing chart located on the product label.

3b. If using QwikSoaker (QT2710) adjust dial to desired dilution ratio. For heavy duty applications, use the 1:5 ratio (setting E) with QwikBright. Spray onto the dirty coil and allow QwikBright to remain in contact with the dirty surfaces for 5 – 10 minutes.

4. Rinse the coil thoroughly with clean water until no cleaner is present on the coils.

QwikSoaker Dilution Table		
A	1:80	1.5 oz/gal
B	1:40	3 oz/gal
C	1:20	6 oz/gal
D	1:15	8 oz/gal
E	1:5	21 oz/gal
Ø	Water Only	Water Only
