QWIKTREAT®

AC Drain Line Cleaner

SKU
QT2405

THE ULTIMATE SOLUTION TO ZOOGLOEA CONDENSATE SLIME!

Simple "pour and go" treatment of our fast-acting formula helps prevent costly pan overflows and annoying AC shutoffs.

HOW IT WORKS

QwikTreat AC Drain Line Cleaner should be used once a month to prevent and clear any buildup present in the system. Simply shake the bottle and pour the treatment directly into the drain line or pan.

For systems with a completely clogged drain line, introduce **QwikTreat** before using a shop vacuum. Allow **QwikTreat** several minutes to loosen and break apart large buildup before vacuuming.

HEALTHY INDOOR AIR

Humidifiers and condensate drain pans provide both a growth medium and a distribution system for mold and mildew and should always be inspected and cleaned. **QwikTreat AC Drain Line Cleaner** should be used to prevent scum buildup in the condensate pan or clogging of the condensate drain line. This simple act of treating the drain pan will help prevent mold from forming in the ductwork and ultimately contaminating the indoor air.

- FIGHTS AGAINST WHITE ZOOGLEA BUILDUP IN THE AC DRAIN LINE AND PAN
- CONTROLS FOUL DRAIN PAN ODORS
- PREVENTS MOLD, BACTERIA, AND VIRUSES FROM CONTAMINATING INDOOR AIR
- CREATES NO CORROSIVE VAPORS
- USE ON ALL AC DRAIN LINES, DRAIN PANS, HUMIDIFIERS, AND DEHUMIDIFIERS
